

NEW CESSARO

OPUS-1

“The new entry point into the Cessaro world.”

Cessaro OPUS-I

Developed for small to mid size rooms from 20 qm to 30 qm. It has got our new 1" Beryllium compression driver mounted to a CNC-milled horn and paired with our well known Alnico 8" driver. The bass cabinet consists of hand polished composite high gloss materials and comes with a special port construction at its back side. The tweeter horn is free standing on the top and is connected through a „ACRA-SWISS“ clamp to the main cabinet, which makes it easy to remove for transportation.

The feet offered in different sizes and finishes are height adjustable and made of stainless steel.

You like to adjust the tweeter sound level to your own discretion?

Ask us about the optional level control switch!

As always:

We guarantee you will feel the presence of Cessaro immediately as the system transports music into your own home.

Tech data:

Concept	2-way horn system
Bandwidth	40-22000 Hz
Bass	Cessaro 8" Alnico drive unit
Tweeter	CNC milled aluminium horn with Cessaro 1" Beryllium compression driver
Efficiency	97,5 dB
Impedance	6 Ohm
Recom. roomsize	20-30 qm
Dimension	30 cm x 55 cm x 125 cm (W x D x H)
Weight	around 63 kg each channel
